The difference in manufacturing

Practice-oriented training for Machine Vision

Acquire new knowledge and exchange experiences

MACHINE VISION

Machine Vision has become an indispensable part of modern, flexible manufacturing today. Machine Vision systems check quality, run processes, control processes, identify components, read codes and provide valuable data to optimize production. In constant use to 24/7 for quality, efficiency and product safety.

Our Machine Vision solutions fit your individual requirements, which are optimally coordinated with your production.

VARIOUS TRAINING COURSES

Our trainings are carried out by experienced Machine Vision experts. We offer courses with basic and advanced content, with theoretical elements and intensive hands-on labs from the industrial work environment.

Our standard training courses cover five areas of Industrial Image Processing:

▶ Smart Camera
▶ NeuroCheck
▶ Halcon
▶ OMS
▶ Artificial Intelligence

CUSTOMIZED PORTFOLIO

Most trainings are offered in our training center in Stuttgart. On request, the training sessions can be individually designed and held on-site. This year the training will mainly be carried out digitally via Microsoft Teams or Skype.

CONTACT
